3. Billing

Enterprise plan and server plans are billed annually in advance, cloud consumption and all other plans are billed monthly. Booking and invoicing of additional database performance (DTU) and compute performance (vCPU) is done via PowerTSM® portal.

4. Calculation

Monthly costs are calculated from fixed costs according to number of tenants and developers and variable costs depending on storage and traffic consumption based on the following formula:

$$C_m = N_{TE} \cdot P_{TE} + N_U \cdot P_U + S_{max_m} \cdot P_S + T_m \cdot P_{TR}$$

C_m	costs of service p.m.
$N_{TE/U}$	number of tenants / users
$P_{TE/U}$	price of tenants / users**
S_{max_m}	maximum storage requirement p.m.
P_S	price of storage**
T_m	traffic [GB] p.m.
P_{TR}	price of traffic**
** according to selected plan.
